Sharpe Engineering Environment Policy

Sharpe Engineering understands that a sustainable future for our company and the Oil and Gas Industry as a whole, is reliant on proper management of all activities to reduce potential environmental damage which may occur as a result of these activities.

Sharpe Engineering is committed to reducing our environmental impact, through manufacture of quality products to reduce potential damage caused through product failure.

Sharpe Engineering is committed to comply with Federal, State and Local government environment legislation and cooperate with those authorities to reduce our environmental impact to a minimum.

Sharpe Engineering has implemented and monitor processes designed to achieve compliance through:

- Effective Preventive maintenance to reduce leak of lubricants
- Comprehensive waste management plan
- Use of licensed bodies for disposal of liquid waste
- Use of electronic documents where possible
- A Quality Management System which delivers efficiency improvement, reduction in rework and consistent quality.

Sharpe Engineering review this policy for continued adequacy through the Management Review Process
