

Sharpe Engineering recognises that all its employees, contractors, suppliers and visitors have a duty to protect the quality of our environment in order to support sustainability in our business activities.

Sharpe Engineering is committed to reducing the environmental impact sustained during the course of our working day; as well as complying with Federal, State and Local Government Environmental Legislation, and cooperating with those authorities to reduce our environmental impact.

We pledge to engage our personnel, suppliers, contractors and visitors to develop and improve environmentally sustainable practices.

Sharpe Engineering has implemented and monitors processes designed to achieve these aims through:

- Providing those in leadership roles with the tools and knowledge to promote environmental management.
- Effective preventive maintenance to reduce leakage of substances from machinery.
- Reducing our consumption of energy and natural resources.
- The use of renewable energy sources, where possible.
- Minimising or eliminating environmental hazards and risks.
- Minimising waste and implementing recycling practices, where possible.
- The use of licensed bodies for disposal of liquid waste.
- The use of electronic documents, where possible.
- A Quality Management System which delivers efficiency, improvement, reduction in re-work and consistent quality.

Peter Sharpe
Chief Executive Officer
